Computer Science After School Enrichment Dojo

Returning and new students will be immersed in a world where technology meets social skill development.

- CodeFu Dojo's teach students the computational logic of Computer Science/coding through fun and creative curriculum that includes coding robots and designing video games to building websites.
- Our classes are unique in that they focus on themes from Bullying to Self Esteem to Manners and Respect.

Students will create a variety of projects beginning with block-based languages & continuing to programming languages such as: HTML, Css, .JS, Ruby, & Python.
